

SPECIFICATION & TECHNICAL INFORMATION SHEET

PHP Item Number: SS8-C

DESCRIPTION:

The **SS8 with Channel** is designed to support conduit and drain lines up to 2-1/2" OD, not exceeding 10" in height. The support is designed for installation without roof penetrations, flashings, or damage to the roofing material. The support can be used on virtually any roofing system from flat roofs to roofs sloped up to 2 in 12. The supports should be spaced according to the specifications. Seismic and High-Wind applications are available for the system.

INSTALLATION PROCEDURE:

New Pipe

1. Layout isolation pads, (provided by contractor), according to the design and layout.
2. Layout SS8-C supports per spacing specifications or PHP layout.
3. Run pipe on channel.
4. Clamp down with channel clamp, (provided by contractor).
5. Adjust channel until height and weight of system is evenly distributed.

Retro-fit

1. Lift pipe, (enough to remove existing support).
2. Clean area where new support is to be placed.
3. Place ISO pad, (provided by contractor).
4. Put SS8-C support on pad.
5. Lower pipe on channel.
6. Clamp down with channel clamp, (provided by contractor).
7. Adjust channel until height and weight of system is evenly distributed.

STORAGE:

Store in the original, unopened containers, under cover, until needed for installation.
